SUMMARY

Backend Software Developer with 1+ year of experience designing and building scalable RESTful APIs using Node.js, Express.js, and Fastify. Skilled in relational database design (PostgreSQL, MySQL), secure JWT-based authentication, and third-party API integration. Experienced working in Agile teams and delivering well-documented backend solutions.

EDUCATION

Master of Computer Applications (MCA)
Savitribai Phule Pune University (SPPU)
Pursuing

Bachelor of Computer Applications (BCA)
University of Mysore

SKILLS

- Node.js
- Express.js
- Fastify
- REST APIs
- JWT Authentication
- PostgreSQL
- MySQL
- HTML5 / CSS3 / JavaScript
- Git, Bitbucket, Postman, Swagger

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Time Management

LANGUAGE

- English
- Marathi
- Hindi

EXPERIENCE

Software Developer — The Baap Company

6 Months Internship + 1 Year Full-Time

- Developed and maintained RESTful APIs using Node.js, Express.js, and Fastify for multiple production modules.
- Designed and implemented CRUD APIs supporting several core business modules.
- Built and optimized database schemas and queries using PostgreSQL and MySQL.
- Implemented JWT-based authentication and role-based authorization to secure application endpoints.
- Integrated third-party APIs and improved overall application performance and reliability.
- Diagnosed and resolved production issues, improving API efficiency and stability.
- Collaborated closely with frontend developers to ensure smooth API integration.
- Worked in an Agile team environment using Git, Bitbucket, Jira, Postman, and Swagger.
- Started as a Backend Developer Intern, gaining hands-on experience before being retained full-time.

PROJECTS

Opinion App

- Mobile application allowing users to create and participate in polls and share opinions.
- Built a secure backend for user authentication, response management, and real-time results.

Technologies: *Flutter, Node.js, Express.js, PostgreSQL*

ERP Project — Enterprise Resource Planning

- Built ERP screens with React, focusing on UI and form workflows.
- Developed user-friendly ERP dashboards and workflows using Angular.
- Created reusable components with strong validations and API integrations.
- Improved application performance and user experience.

Technologies: *React, Angular*

VMS Project — Vendor & Time-Slot Management

- Developed VMS modules for vendor and time-slot management using Angular.
- Built interfaces for vendor management, interview scheduling, and time-slot creation.
- Implemented dynamic validations and smooth UI interactions.
- Enhanced workflows with time-zone mapping and search filters.

Technologies: *Angular, PrimeNG, ng-select*

Task & Workplace Management System

- Built a backend platform for managing employee tasks, attendance, and workplace resources.
- Designed RESTful APIs for task assignment, status tracking, and deadline management.
- Developed workspace/desk and meeting-room booking modules with conflict-free scheduling.

Technologies: *Node.js, Express.js, PostgreSQL, MySQL*
